

Lubelskie (PL81): ERDF + JTF Program Proposals

3 packages for ERDF + JTF, 2028–2036 scenario. Purpose: reduce regional inequality, support climate transition, and secure fair outcomes.

Package 1: Energy-Poverty Reduction and Carbon-Ready Housing

ERDF (2028–2032): retrofit public buildings and old housing; heat-pump pilots; smart metering; SME energy-efficiency support. JTF (2030–2034, 2036 scale-up): retraining for building maintenance, heating, and related jobs; workforce transition support. Indicative scale: ERDF €28–35m / JTF €14–20m. Expected impact: 12,000 dwellings targeted, winter energy costs down 10–15%, 2,500 workers re-skilled. No double funding: different activities and beneficiaries by fund and phase.

Package 2: Low-Carbon Mobility and Eastern Corridor Connectivity

ERDF (2028–2034): clean bus links in city–periphery–rural routes; route electrification for short corridors; ITS and fare integration. JTF (2029–2036): transport-mechanics and EV maintenance training, operator transition support, supplier reorientation. Indicative scale: ERDF €45–60m / JTF €14–26m. Expected impact: public-transport share +8–12pp, average commuting time -8 to 12 minutes, post-training employment >60% within 6 months.

Package 3: Rural Diversification and Just-Transition Industrial Value Chain

ERDF (2029–2036): agri-bio processing, low-carbon logistics nodes, SME digital and decarbonisation upgrades in rural areas. JTF (2031–2036): transition package for coal-linked and vulnerable workers; social support and placement partnerships. Indicative scale: ERDF €40–57m / JTF €16–24m. Expected impact: 40 new low-carbon SMEs, stronger regional employment resilience, 4,000 vulnerable workers retained or re-employed.
